## LYNN UNIVERSITY MISSION

---

Founded in 1962 and located in Boca Raton, Florida, Lynn University is a private coeducational institution whose primary purposes are education, the preservation, discovery, dissemination and creative application of knowledge, and the preparation of its graduates with the academic foundation for life long learning. Service, scholarly activity including research, and ongoing professional development allow the faculty, in conjunction with the entire University community, to fulfill its purposes: facilitating student-centered learning and fostering the intellectual life of the University. The University offers Associate, Baccalaureate, Master, and Doctoral degrees as well as non-credit continuing education programs. Breadth, depth, and application of learning are the bases for competencies in all programs. Graduate curricula promote advanced or expert knowledge and scholarship. Programs are delivered through a variety of venues, including a traditional residential campus setting, distance education, off-campus sites, and international locations.

The University admits applicants with varying backgrounds and levels of academic proficiency who demonstrate potential for academic success. The student body includes traditional aged and adult learners from the United States and many other nations. Academic programs are coordinated with a range of support services, extra-curricular activities, international and cultural exchange programs, and career opportunities to promote students' ongoing intellectual, professional and personal development. Education, service and leadership are emphasized throughout the University experience.

The Board of Trustees, administration, faculty, staff, students, and alumni play an integral role in on-going assessment, planning, evaluation, and governance to enable the University to improve and to demonstrate institutional effectiveness in the following areas: educational programs, delivery systems, public service functions, support services, and administrative operations. Lynn University will have fulfilled its purpose if its graduates leave with knowledge, confidence, competencies, and ethical consciousness to assume positions of responsibility and leadership as productive, global citizens prepared for life long learning.
